

Microsoft®

SharePoint Designer 2010 Level 2

Duration:

Traditional Instructor Led Learning -1.00 Day(s)

Software Assurance Vouchers Not Accepted

Now that you know how to create customized SharePoint sites matching your branding, you may want to extend your sites to include more functionality. With SharePoint Designer, you can extend your sites more easily than before.

Course Objective: You will use SharePoint Designer to extend and customize existing SharePoint sites.

Target Student: This course is intended for entry-level SharePoint solution developers who are currently capable of creating basic SharePoint sites using the out-of-the-box functionality provided by the built-in SharePoint Designer templates, and who now want to extend or create SharePoint sites with functionality by incorporating server web controls, data controls, customized workflows, and administration.

Delivery Method: Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities - Mentor Lab - Flexible

Duration: 1.00 Day(s)

Prerequisites: It is recommended that the student complete the Microsoft® SharePoint® Designer 2010: Level 1 course prior to this course.

Performance-Based Objectives

Upon successful completion of this course, students will be able to:

- Work with ASP.NET forms.
- Work with Data Sources.
- Use SharePoint templates to update existing sites and create new templates from these changes.
- Learn some advanced data integration techniques.
- Customize existing workflows.
- Learn about administration tools in SharePoint Designer 2010.

Course Content**Lesson 1: Working with ASP.NET Forms**

Create an ASP.NET Form
Modify Form Control Properties
Validate Inputs
Customize an Interactive Button

Lesson 2: Integrate Data Sources

Implementing Data Sources and Displaying Data in Data Views
Access a Data Source
Import Data into a Data View
Update the Data View Presentation
