

# Meet **Yvonne**. She is a Network Administrator with a difference.

She is a **Certified Ethical Hacker**.

## What is a Certified Ethical Hacker?

A Certified Ethical Hacker is a skilled professional who understands and knows how to look for the weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker.

## Who is the audience for a CEH Certification?

The CEH certification is for an individual who is usually employed with the organization and who can be trusted to undertake an attempt to penetrate networks and/or computer systems using the same methods as a hacker. Illegal hacking (ie; cracking computer systems) is a felony in the United States and most other countries. But when this type of hacking is done by request

## Are there prerequisites?

Candidates for the CEH program should have a Security+ Certification or equivalent experience.

## Security Experts Wanted

As our world becomes increasingly connected, more IT security professionals are needed in the following industries:

- Banking
- Healthcare
- Government
- Financial
- Education

Our IT Professional Certification program is designed to make you employable in a security capacity with one of many growing industries.

## Hacking is a Problem

Computers around the world are systematically being victimized by rampant hacking. This hacking is not only widespread, but is being executed so flawlessly that the attackers compromise a system, steal everything of value and completely erase their tracks within 20 minutes.

The goal of the ethical hacker is to help the organization take preemptive measures against malicious attacks by attacking the system himself; all the while staying within legal limits. This philosophy stems from the proven practice of trying to catch a thief, by thinking like a thief. As technology advances and organization depend on technology increasingly, information assets have evolved into critical components of survival.

## 5 Day Certification Course

Our five day CEH course covers everything in the official EC Council curriculum including the following:

- ✓ Intro to ethical hacking
- ✓ Hacking laws
- ✓ Footprinting
- ✓ Google hacking
- ✓ Scanning
- ✓ Systematic hacking cycle
- ✓ Trojans and backdoors
- ✓ Hacking email accounts
- ✓ Phishing
- ✓ Social engineering
- ✓ Hacking web servers
- ✓ Password cracking techniques
- ✓ Hacking wireless networks
- ✓ Hacking Linux
- ✓ Evading firewalls, detecting honey pots

## Certification Testing

To receive the Certified Ethical Hacker Certification you must pass one exam: CEH Exam 312-50. LeapFox is an authorized CEH testing center so testing can be done right at our Meridian Office.
